MULTIS COMPLEX Greases
Rely on high technology greases for severe applications
MULTIS COMPLEX, the top tier of multipurpose greases

■ MULTIS COMPLEX SHD
Synthetic PAO oil based

- Recommended temperature range -50°C to 160°C
- Medium to heavy loads
- Slow to high speeds (depending on the product)
- Wet conditions

Your advantages
- Easy starts at very low temperature, down to -50°C
- Low traction coefficient brings energy savings
- Excellent protection and performance of your equipment even at high temperature
- Increased service life of the bearings
- Longer lubrication intervals
- Reduced downtime for maintenance operations

■ MULTIS COMPLEX HV2
Mineral oil based

- Very heavy loads
- Recommended temperature range -30°C to 160°C

Your advantages
- Outstanding protection and performance of mechanical parts under extreme pressure
- Long lasting protection due to durability of the lubricant film
- Enhanced anti-corrosion properties
- Longer lubrication intervals

■ MULTIS COMPLEX EP
Mineral oil based

- Moderate to high speeds
- Medium to heavy loads
- Recommended temperature range -20°C to 160°C
- Centralized greasing system

Your advantages
- Just one product to lubricate a wide variety of equipments under moderate temperatures
- Excellent protection of parts against wear and corrosion
- Simplification of maintenance operations
- Minimization of lubricant stocks

* MULTIS COMPLEX HV2 MOLY: dopped version with molybdenum disulfide. Grease dedicated for off-road vehicles operating under extreme conditions.

* Viscosity grade, according to the N.L.G.I classification (National Lubricating Grease Institute) ** Typical kinematic viscosity of base oil at 40°C in mm²/s

## RECOMMENDATIONS FOR USE

- **Verify the pumpability of the grease with your lubrication system before the first use.**
- **Preferably use a pneumatic pump system or cartridges for lubrication operations.**

** Viscosity grade, according to the N.L.G.I classification  
*** n = rotation of the bearing per minute  
** n = average diameter of the bearing in mm

- **Avoid contamination of the grease** by dust or dirt when applying.
- **MULTIS COMPLEX greases are miscible** with most other conventional soap greases. Contact us for the choice of the grease suitable to your equipment and operating environment.

For further information, see the technical data sheets and the material safety data sheets.
Lithium complex, a technology with exceptional performance

In the most severe operating environments (load, temperature, speed, humidity), our multipurpose greases MULTIS COMPLEX protect your equipment efficiently and durably, much better than any grease made of simple lithium thickener. Indeed, the MULTIS COMPLEX range is formulated with lithium complex soap, characterized by a very dense and solid structure. This premium technology, associated with the properties of synthetic or mineral base oils, brings exceptional lubrication performances to our MULTIS COMPLEX greases.

**Wide working temperature range**

*Easy starts of your equipment at very low temperature* until -50°C, and resistance to continuous work at high temperature until 160°C.

**Excellent mechanical stability**

*Excellent anti wear protection of parts under heavy loads*, due to enhanced ability of the grease to absorb shocks and vibration.

**Superior resistance to water washout**

*Reinforced protection of your equipment against rust and corrosion*, with the perfect adhesiveness of the grease on metal.

**Long service life**

*Longer lubrication intervals*, as a result of excellent mechanical stability and low bleed tendency.

The performance and multipurpose ability of the greases MULTIS COMPLEX ensure simplified maintenance operations, while keeping optimal efficiency and protection of your equipment. As a result, **you gain both on productivity and maintenance cost savings!**
4 good reasons to choose TOTAL

A major company
Total Lubrifiants is a subsidiary of TOTAL. The Group is the world’s fifth largest integrated energy company* and employs more than 96,000 people on five continents. Total Lubrifiants produces and sells its products under the TOTAL brand in more than 160 countries.

Safe and eco-friendly products
Total Lubrifiants renews its ISO 9001 certification every three years, as a guarantee of its longterm commitment. Elements aimed to reduce the risk of toxicity, the VOC emissions, and to encourage recycling and elimination from the environment, are incorporated into the design of every new product.

Innovation
Thanks to a major investment in R&D and close cooperation with equipment manufacturers, Total Lubrifiants creates high-technology products with substantial added value, for optimal performance and protection of your machinery.

Partnership
The wide range of TOTAL products means that you can find the maintenance lubricants or specialized products to meet your every need. By choosing TOTAL, you can be fully confident that our team will work with you to enhance your productivity and reduce your maintenance costs.

* Based on market capitalization in dollars at 31 December 2009.
