

ALTEK® ECO²B

ALTEK® ECO²B is bitumen from direct distillation with additivation, in blocks packed with a thermofused film. It is often used as binder for bonding of insulating materials under hot temperatures (cellular glassfibre) and waterproofing membranes, for insulation and waterproof treatment of industrial buildings' roofs. After the bloc liquefaction in a regulated temperature kettle, the material is ready to use for bonding operations. Compared to oxidized bitumen use for the same bonding insulating properties, ALTEK® ECO²B brings higher performances such as enhanced adhesion characteristics and optimum creep resistance, a better storage stability during summer weather and a better comfort for the installation teams.

The Total Ecosolutions Advantage

ALTEK® ECO²B was developed for an optimal application handling at a melting **temperature 70°C lower** than the one usually fixed for oxidized bitumen in standard conditions (temperature > 220°C and non-regulated temperature kettles). Moreover, the thermofused packaging film improves on-site waste management.

The Environmental Performance

Between **6%⁽¹⁾ and 27%⁽²⁾** reduction in energy consumption on the whole life cycle and **between 36%⁽¹⁾ and 58%⁽²⁾** during the application phase

Between **6%⁽¹⁾ and 27%⁽²⁾** reduction in greenhouse gases emissions on the whole life cycle and **between 36%⁽¹⁾ and 58%⁽²⁾** during the application phase

Reduction by a **factor 14** of polycyclic aromatic hydrocarbons emissions during the application phase

⁽¹⁾ Standard practice with a non-regulated kettle

⁽²⁾ Use of a regulated kettle

EXTERNAL VERIFICATION

Independent auditor Ernst & Young has verified that this product was labeled according to the method described in the Total Ecosolutions Guidelines and that the guidelines comply with the principles set out in the ISO 14020 and 14021 standards which govern environmental claims and particularly their accuracy.

Label Award date : January 2016
Guidelines Version 4

Label Term : December 2019

Geographical Scope : Europe

Leveraging innovation to serve continuous improvement, the Total Ecosolutions program involves developing products and services that enable our customers to improve their environmental footprint.
