Automatic Transmission Fluid developed for the latest generation of high efficiency 6 and 7 speed planetary gearboxes.

New multi-purpose ATF Low Viscosity for the latest generation of 6-speed automatic transmissions.
**FLUIDMATIC MV LV**
Automatic Transmission Fluid developed for the latest generation of high efficiency 6 and 7 speed planetary gearboxes.

**MAIN ADVANTAGES**

- **Meets the levels of main transmission manufacturers**
- **A lubricant with exceptional friction and anti-shudder performances**
- **A lubricant with outstanding film-strength and anti-wear properties for best performances**
- **A lubricant with exceptional oxidation resistance for a better longevity of the transmission**
- **A technically low viscosity high performance lubricant**

**APPLICATIONS**

Automatic transmission fluid for the latest generation of high efficiency 6 and 7 speed planetary gearboxes

**TOTAL FLUIDMATIC MV LV** is suitable for use in automatic transmissions requiring either GM dexron VI, Ford Mercon LV, Mercedes Benz approvals, Nissan Matic S, Hyundai/Kia SP-IV, Honda Z1 or Toyota T-WS fluid specification.

**Performance levels**

- Toyota T-WS (JWS 3324) • Hyundai/Kia SP-IV • Nissan Matic S • JASO 1A
- GM Dexron VI • Ford Mercon LV • ZF M-1375.4 (GHP) • Honda ATF DW-1
- MB 236.12 & 236.14

**Fluidmatic MV LV** has been formulated with selected friction modifiers which provide excellent friction characteristics. These improve driver’s comfort with smooth and efficient shifting without shudder.

**Fluidmatic MV LV** provides a strong protection against oxidation over time and protection of the transmission.

**Fluidmatic MV LV** provides a very good oxidation control of the fluid over time even in very severe conditions.

**Fluidmatic MV LV** remains shear stable over time providing extended life time of the fluid.

**Fluidmatic CVT MV** provides significant fuel economy benefits.
